Our goal is to prepare nurses to combine the highest level of scientific knowledge and technological capacities with the practice of responsible care. Nurses today need skills in technology, communication and interpersonal relationships to be effective members of the health team, as well as, meet the needs of the changing healthcare system. They need skills in teaching, collaboration, guidance, management, defense and application of the theory and research to practice. This book edition preserves all the contents that have been well received by the nurses of faculty and students who have used previous editions. Revisions are made in some procedures, such as Basic Life Support (BLS) and Advanced Cardiac Life Support (ACL) in accordance with AMERICAN HEART ASSOCIATION e S 2010 Guidelines. Newly added information includes a chapter each on legal and ethical aspects of nursing practice. This information, the thought of the authors, is essential to understand the legalities involved with performances of procedures and techniques and allow nurses to exercise safely and effectively as trained workers. One of our main goals in in The magazine edition was to help prepare nursing students to provide the care of quality to patients of all ages and families through health and home, safely and effectively home settings. We hope we succeeded and welcome the feedback of our readers. Jacob R Annamma Rekha Jadhav Sonali Tarachand 8 9 Procession of the first edition in Current nursing practice has evolved through many changes influenced by advances in science and technology that has made the most complex medical care. As a mode to diagnose and treat diseases and manage patients in different phases of health disease continuum disease, various nursing and rewritten procedures are added. The use of specialized equipment, articles and assistants with advanced procedures have become a necessity in patient care. Several nursing procedures taught and practiced yesterday have become obsolete due to the new knowledge of disease pathology and therapy. The growing body of nursing research further challenges and stimulates further challenges and stimulates nurses to acquire new knowledge and refine their ability of critical thinking. Nursery education today aims to provide students with a broad knowledge base that would help them provide expert and necessary assistance for customers with various health problems. It is therefore essential that theories and basic skills are essential and become equipped to further develop and improve their ability to apply analytical thinking in clinical situations. Nurse educators in India have always been addressed by the need to have relevant materials suitable for the practice standards of the day. The books that meet the above criteria are written in the context of developed countries where advanced equipment and materials are used on the market to perform most nursing procedures. A procedure manual, written in the Indian context, in which the health facilities range from most advanced in multi-screen tertiary hospitals in large cities at primary care centers in rural India was a serious necessary. This manual will help you prepare nurses who can demonstrate critical thinking and analytical ability, able to make adaptations into variable situations. A manual of relevant procedures for current nursing practice in India has been needed, it has been heard by a nurse education here. The book's clinical nursing procedures: the art of nursing practice is an all-in-one compilation of nursing procedures. The basic, advanced and community health care procedures are organized and presented in 15 chapters. The editors and contributors have taken care to present the material in a concise format, direct and simplified in an easy to follow language and, above all, in the Indian context. The scientific logic of every nursing action is included in such a way as to allow nursing students and the practice of nurses to use the clinical judgment of the sound by emphasizing the cognitive, interpersonal and psychomotor capacities necessary to carry out nursing procedures. Special considerations are required wherever further explanations are required for detours and adaptations. The contents of the book include nursing procedures to be performed independently by nurses and interdependently providing assistance to health professionals or customers themselves. Most of the nursing procedures prescribed for university education by Apex organisms in India are included. A special feature of this book created and has From Indian nurses is the numerous colorful illustrations and photographs that will help to master and strengthen the skills of nursing students and practice nurses. Publishers are confident that this book will reveal a useful tool for university students and professional nurses working in different settings throughout India. Annamma Jacob Rekha R Jadhav Sonali Tarachand 10 11ACKNOWLEDGMENTS It takes more than a great determination and interest incurred to write a book. For the completion of activity, encouragement, And the cooperation of many are essential. For the production of this book, publishers are profoundly grateful to the administration of Bhagwan Mahaveer Jain College of Nursing, Bangalore, Karnataka, India. The president of Bhagwan Mahaveer Memorial Jain (BMMJ) trust Mr Sampathraj Gadia always encouraged us and provided the freedom and facilities necessary for the capital and elderly faculty of the college to collect the knowledge and teaching professional nursing high quality for their students. BMMJ TRUST members, Bansal Mr. Parasmal and Mr. Phoolchand Jain did a great job, providing the college library with a vast collection of books and periodicals for reference. This greatly improved material preparation for the book. As the idea of putting together all the nursing procedures taught to nursing students in the college emerged in the mind of the first group of teachers, the managing director of the Hospital and College of Nursing, Dr. Kishore Murthy offered great encouragement and support. The publishers are grateful to Dr Kishore Murthy. Most of the teachers who worked in the college of nursing, from its beginning in 2003, a way of writing and modifying the procedures for the book. Publishers thank each of them for their contribution. The nursing staff of the Bhagwan Mahaveer Jain hospital (BMJ) whose standards which needed for the provision of safe and effective nursing care for patients and students of the BMJ College of Nursing practice have been our inspiration to undertake the task of preparing this Manual of care procedures. For the many photographs and illustrations included in the personal book, university and hospital, their family, students and patients themselves and their efforts offered, and we record our sincere thanks for each of them. It was Mrs. Anuradha, that in the final stages he undertook the work of typing all the material in a professional way. Preliminary work was made by Mrs. Vajchal, Ms. Sudheshna Mukherjee and Ms Sylvia Eileen. Fortunately we recognize their contribution. Finally, but above all, again we recognize the administration of the BMJ College of Nursing, the BMMJ trust in honor of which this book can be published.
